- Notes:
1. In a few instances, non-reporting or underreporting of some data makes for apparently inconsistent results, e.g. see total BB eggs vs hatched vs fledged. However, number of fledglings were always reported. Any VBS member who might want a data summary *excluding* the data sets containing underreported elements can email the compiler at ce.chambers@cox.net.
 2. A total of 17,547 birds of all species were fledged.
